**(54) PERSONAL
COMMUNICATION
NUMBER CONTRACT
PARTY STATE MANAGING
METHOD**

(57) Abstract:

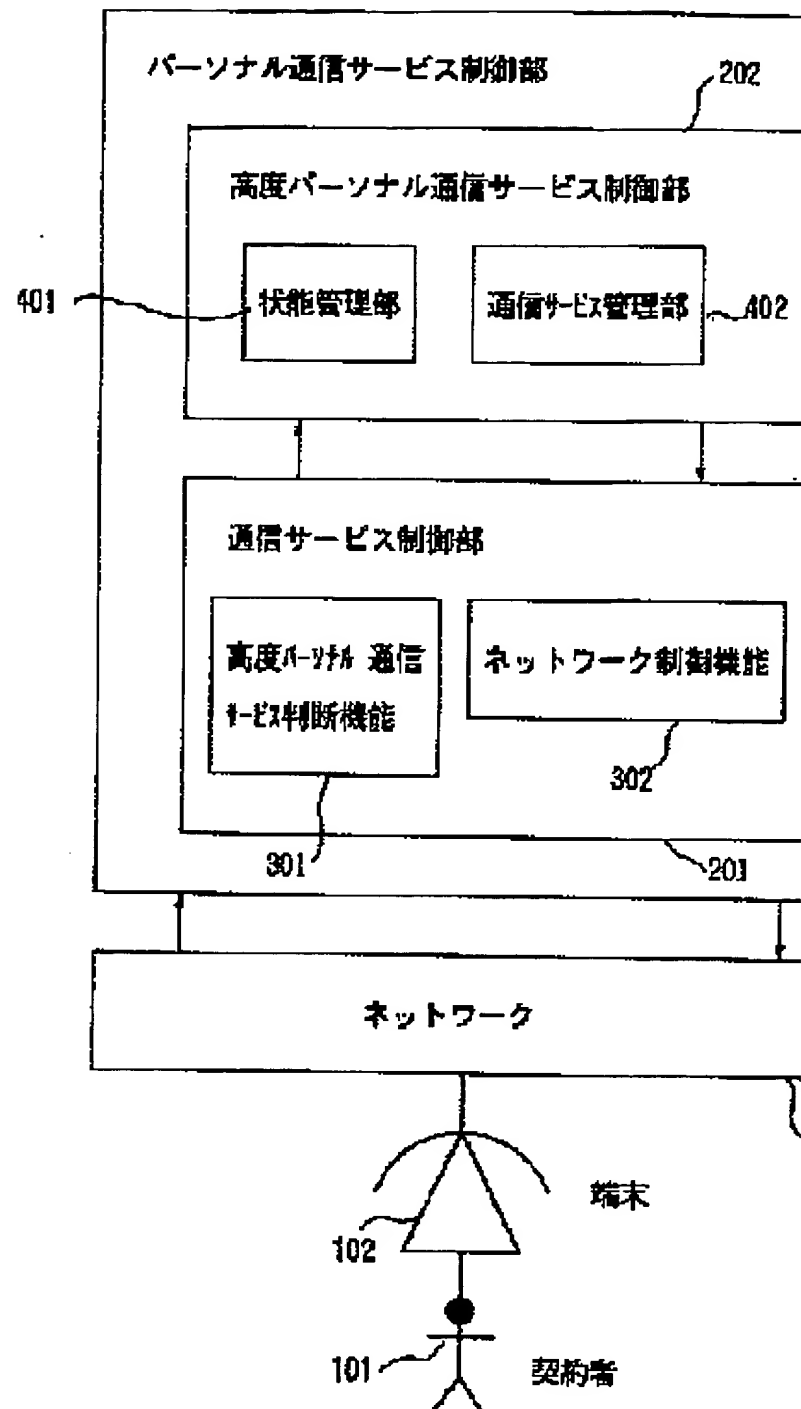

PURPOSE: To provide the personal communication number contract party state managing method for more precisely corresponding to the request of a contract party.

CONSTITUTION: As the states of a contract party 101 to be managed by a network 103 corresponding to a personal communication number, plural states to be previously designated by the contract party 101 itself are defined to the network in addition to the 'idle' state of enabling call incoming to the contract party 101 and the 'occupied' state of disabling call incoming to the contract party and among the plural states defined by the contract party itself, the present state is set to the
